

Swift Navigation EPM Job Description

Technical Program Manager

Swift Navigation is looking for an outstanding Technical Program Manager, who is excited to contribute your hands-on project management skills, deep technical expertise, and excellent leadership skills to help usher in the future of autonomous vehicles. You will be responsible for working with business and engineering teams to turn product vision into tangible tasks that result in real products. Together, we'll create products that make high accuracy positioning ubiquitous and easy to use across a wide variety of industries and applications in unmanned aerial vehicles, robotics, and autonomous transportation.

In this role you will:

- Interact with Project Leads, Product Managers, Development & infrastructure teams to define and deliver complex features.
- Lead the effective and efficient delivery of the large, complex hardware and software projects.
- Anticipate bottlenecks, provide escalation management, anticipate and make tradeoffs, and balance the business needs versus technical constraints.
- Maximize resources for the greater good of the organization.
- Identify, assess, track and mitigate issues and risks at multiple levels.
- Create, maintain and disseminate project information to stakeholders.
- Drive effective teamwork, communication, collaboration and commitment across multiple disparate groups with competing priorities.

Candidates should have skills and experience with:

- Developing and delivering on software and hardware project milestones
- Proven track record of being able to learn, develop and implement new technologies, ideas and initiatives
- Working across multiple disciplines, presenting findings to an executive audience and publishing findings in written form
- Communicating with technical and non-technical stakeholders
- Strong candidates will also have:
 - Bachelor's degree in CS, EE, Math or a related technical field
 - Experience with building high-performance, highly-available and scalable distributed systems
 - Knowledge and implementation of lean and/or Agile processes
 - 5+ years of relevant work experience in technical program and/or technical project
